Computer Science student with hands-on experience in backend development, REST APIs, SQL, and Python. Strong debugging, problem-solving, and system troubleshooting skills across Windows and Linux environments. Seeking a software development role building reliable, maintainable applications. Experienced with Python, Java, SQL, Golang, REST APIs, and backend development workflows.

EXPERIENCE

Computer Specialist — Best Buy

2026 – Present

Assist customers with computer selection, troubleshooting, and device setup. Explain hardware specs, compatibility, and performance differences. Provide clear technical guidance in a fast-paced retail environment.

Administrative Support — USDA Forest Service

Mar 2024 – Aug 2025

Processed and audited financial data with 99%+ accuracy. Investigated inconsistencies and improved workflow efficiency. Worked in a high-accountability, data-critical environment.

Sales Consultant — Autosavvy

Jul 2022 – Nov 2023

Managed CRM systems, maintained accurate customer data, and resolved system issues. Balanced technical system use with customer communication.

Pharmacy Technician II — UNM Hospital

Dec 2019 – Jul 2022

Maintained accurate EMR records, ensured compliance, and managed inventory systems in a regulated environment.

INTERNSHIPS

Full-Stack Golang Intern — MyAccessibleHome.org

Jun 2026 – Present

Contribute to backend development tasks using Golang, REST patterns, and

SKILLS

Languages: Python, Java, SQL, JavaScript, HTML/CSS, Go

Backend & Web: FastAPI, REST APIs, JSON, Git/GitHub

Systems: Windows, Linux, CLI tools, debugging workflows

Databases: SQLite, JOINS, aggregations

Networking: TCP/IP, DNS, DHCP basics

Education

Central New Mexico Community College (2026)

A.A.S. Computer Science
Coursework: Java Programming, Data Structures, Database Management

University of New Mexico (expected 2027)

Pursuing B.S Computer Science

CERTIFICATIONS

Google IT Support Professional Certificate - Coursera (2026)

Networking, troubleshooting, system administration, Windows/Linux, security fundamentals.

structured workflows. Collaborate with senior developers on feature implementation and code reviews. Maintain confidentiality under NDA.

PROJECTS

Workout Logger API — FastAPI + SQLite

Built REST API with validated endpoints, SQLite integration, and reliable routing.

Web Scraping & Processing Tool — Python

Extracted, cleaned, and structured HTML data with retry logic and adaptive parsing.

LiftLog Database — SQL

Designed normalized schema; wrote JOINS, aggregations, and validation queries.

Portfolio Website — HTML/CSS/JS

Responsive multi-page site deployed via GitHub Pages.
